Android Development

DEVOPS / TESTING

Test Automation

Testing Strategies

Build Automation

Continuous Deployment

Continuous Integration

RedHat / Debian User

METHODOLOGY

Domain Driven Design

Clean Code Enthusiast

Fast Feedback Loops

Mentoring and Pairing

Lean / Agile Processes

(Product Exploration Phase)

TOOLBOX

Main Languages

Java (JVM&Android) • Groovy • Python

• Angular w/ Typescript • SQL-92+

Main Frameworks

Spring • Spring Boot • Puppet

Testing

Spock • Selenium • Mockito • JMeter

Main Tools

Jenkins • Teamcity • Jira • Trello •

Usvoice • Subversion • Git • Nagios •

Maven • Gradle

Operating Systems

Debian • RedHat/CentOS • MacOS

RECENT PROJECTS

SENIOR SOFTWARE ENGINEER | EBAY / MOBILE.DE (FREELANCE)

Expected June – December 2018 | Potsdam Dreilinden, DE

- Development of a high traffic API gateway ("Sell API")

SENIOR SOFTWARE ENGINEER | DEUTSCHE POST AG (FREELANCE)

April – June 2018 | Berlin, DE

- Lowered operational and development cost anticipating upcoming projects by optimizing business processes and removal of legacy services.

SENIOR DEVOPS ENGINEER | DEUTSCHE POST AG (FREELANCE)

January 2014 – Feb 2018 | Berlin, DE

- Helped shaping a massive microservice platform, serving millions of customers.
- Migration of critical path legacy monoliths into scalable microservices.
- Greenfield development of full stack microservices using various techstacks.
- Increased release frequency by improving the release process.
- Introduction of Domain Driven Design techniques into development process.
- Introduction of robust test automation allowing for Continuous Deployment.
- Advocacy of systematic knowledge sharing using various techniques like mentoring, pairing, mob programming and DDD's ubiquitous language.

CO-FOUNDER, ANDROID DEVELOPER | EARLYNERDS GBR

March 2013 – February 2016 | Berlin, DE

- Creation and distribution of a productivity tool for teachers.
- Lean development of Android & Windows Mobile apps, self distributed.
- Established tight feedback loops with customers, leading to outstanding customer retention and user driven development.
- Achieved leadership by market share on Windows in Germany in our market.
- Achieved top 3 spot by market share on Android in Germany in our market.

CONTINUOUS DELIVERY CONSULTANT | FREELANCE

October 2011 – November 2013 | Dresden & Berlin, DE

- Technical consulting regarding software test automation for mobile apps.
- Introduction of Continuous Integration & Continuous Delivery for backend services and mobile apps.
- Support of presales in the Application Lifecycle Management (ALM) market with knowhow regarding CI/CD, configuration management and SCM.
- Helped European clients in the enterprise field (engineering, banking, logistics) to achieve technical excellence in their development processes.

SIDE PROJECTS

OPEN SOURCE ANDROID APP DEVELOPMENT | POCKET LOG

November 2015 – Present

Creator and maintainer of a native Android app that offers revision-safe time tracking for Contracts and Freelancers. See [Github](#), [App Store Presence](#)

PLUGIN-MAINTAINER / OPEN SOURCE DEV | JENKINS PROJECT

2012 – 2015

Maintainer of the Jenkins libvirt slave plugin, see [Plugin Landing Page](#)
